

# BRUNOX<sup>®</sup> epoxy

## Rust stop + Primer!

Swiss quality product

Importer/Dealer:

**BRUNOX®-Epoxy** is the only patented anti-corrosion and primer-system in one which contains **epoxy resins**. It is also the unique product which is available out of the handy **BRUNOX® Epoxy spray can**.

The amber-coloured clear liquid forms a metallo-organic iron complex, which stops corrosion and forms a perfect primer coat.

## The important advantages are:

- X Compatible** with commercially available top coats.
- X Penetrates approx. 7-10 times deeper** into the rustpores than ordinary rustconverter emulsion products.
- X No brush traces**, if you apply the product by brush.
- X Available** in aerosol can.
- X Can be applied also airless** or by high pressure spray gun.
- X Can be stored for an unlimited period** in well sealed bottles.
- X Free from heavy metals and mineral acid.**

Swiss quality product

made by BRUNOX AG – Switzerland

For application by brush: 30ml, 100ml, 250ml, 1000ml, 5l

For application by aerosol cans: 150ml, 400ml

**Physical properties:**

Expected coverage: 15m<sup>2</sup>/ l for 1 coat

Dilution: With up to 10 %

# **BRUNOX®-Epoxy is a product for professionals**

for the maintenance of structures, plants, machines, vehicles ect..

**BRUNOX®-Epoxy is because of its properties **easy to apply!****

**With only 3 steps you can stop the corrosion!**

- 1. Take off the loose rust with a wire brush, grinding wheel etc.;**
- 2. Apply 2 coats by brush or (3-4 spray) on the rust pores. Allow the BRUNOX® Epoxy to completely dry\***
  - **No grinding**
  - **No washing off**
- 3. You must then apply a top coat.**

- \*drying time depends on humidity and temperature – must be „nail hard“.
- Can be stoved at up to 180 °C during 10 minutes.
- Brush can be cleaned immediately with water, airless spray gun with acetone.
